Start your survival, troubleshoot, complete tasks and progress along the way. The protagonist of the game is a dinosaur, which we usually see in movies and books. It is a carnivore from the Cretaceous period. Dinosaurs that you can choose to play: • T rex Tyrannosaurus; • Raptor; • Dilophosaurus; • Spinosaurus; • Triceratops; • Carnotaurus; • Raptor; • Tyrannosaurus, and many more! In Rex Dinosaur Simulator, he runs towards pterodactyls, which must be avoided and dealt with. As you progress through the game itself is easy and fun. The development of the T Rex dinosaur simulator game began in November 2021, however, the final improvements were completed in December of the same year and continue to this day. How to play The Cursed Isle Features of the gameplay - online dinosaur hunting simulator: 1. System of growth! Dinos online does not appear immediately large, care is needed. You need to grow him. To do this, it will be necessary to survive, find food and drink. 2. First, the player needs to select a dinosaur. Remember - this is your personal dino! The game has not only carnivorous dinosaurs, but also herbivores, such as triceratops, stegosaurus, ankylosaurus, cosmognathus, etc. Players can team up with other herbivores to resist predators and, most importantly, survive! 3. Food extraction, if the dinosaur is a predator, then you need to kill the dinosaurs of other players in order to get meat for yourself, if your herbivore, eating is easier, you need special ferns, you can get enough of them! You can drink by the sea or in any lakes and reservoirs on the map. 4. Text Chat. You can chat with friends and players around the world, build strategies, make peace, and much more. You won't be able to complete the entire animal simulator because, according to the developers, it will take approximately 17 million years. About the same number of years ago, Tyrannosaurus Rex dinosaurs still roamed our planet. Also, as the speed of the game is constantly increasing, there is a certain point where people are physically unable to react to obstacles. Even neural networks that have been trained to play dinosaur hunting end up failing because the frame rate isn't fast enough. The speed of the T Rex dinosaur in the game can be very high.
